

OUR HISTORY

Performed on two direct-to-employer value based contracts (VBCs)	2014	Seattle Children's Care Network, LLC formed, governed by a Board of Managers made up of CIN members
Launched population health tool with integrated clinical visit and billing data (CCDAs, 837s)	2016	Comprehensive set of policies and procedures developed to guide the network
Core clinical protocols established to support primary pediatric care	2017	First VBC with commercial health plan in place
Two additional VBCs with large commercial health plans	2017	Financial analytics tool launched for comparative use rates and site-of-service cost variation analyses
Board approves transparent quality and risk score variation reporting among participants		
SCCN achieves URAC accreditation for Clinical Integration	2018	SCCN Board approves participation in practice-based research network (SCRI)
Time-of-day ER utilization analyses shared with SCCN practices	2018	Key quality and risk coding reports securely accessible online to practices via SCCN Pulse
MOC achieves 9.5% improvement on Immunization Measure 'Combo 10'		Asthma MOC project resulted in a 17 percentage point improvement in asthma quality performance (AMR measure)
Nine practices submitting for PCMH certification	2020	Established SCCN care management and family support program for complex kids
New VBC lauched with Medicaid Managed Care Organization		First Specialty Scorecard analyses shared

OUR MISSION

To be the best manager of pediatric lives in the Pacific Northwest with superior clinical outcomes and exceptional patient and provider experience while decreasing cost trends.

OUR VISION

Seattle Children's Care Network will be the best performer on quality, cost and experience while being an essential partner to groups, delivering value, contracts, financial return and collaboration.

WE WILL:

- Actively and transparently share performance data with practices
- Engage physician leadership in decision making through a robust structure of a Board of Managers, committees and working groups
 - Pursue value based contracts on behalf of the network
- Engage payers (health plans, government agencies and employers) in promoting value based care in the community
 - Distribute shared savings and performance incentives under SCCN Board of Managers' direction
- Develop data systems and processes that support coordinated care and clinical integration
- Facilitate clinically integrated network activities, including evidence-based medicine and forums to share best practices
 - Maintain a culture of transparent and accountable coordination of care with patients and providers
- Collaborate with practices to develop clinical guidelines that improve quality, coordinate care and manage cost for the children we serve
- Implement data collection, quality measurement and care coordination tools

Seattle Children's Care Network

FACTS AND STATS

Spring 2020

A pediatric organized system of care formed as a collaboration among physicians, other providers and administrators who share a commitment to transform care and proactively respond to the changing healthcare landscape.

Visit our website SeattleCCN.org

WHAT MAKES SCCN UNIQUE?

- Exclusive focus on children's health
- Integration and partnership with Seattle Children's Hospital, a premier pediatric hospital partner, and Children's University Medical Group
- A strong spirit of collegiality and collaboration within the network, focused on improving care for children
- Recognition and trust as change agent and influencer for children's health improvement

- Innovative partnerships with health plan partners, seeking to advance the health of children together
- Provision of pediatric-focused resources and capabilities for our network participants

OUR ACCOMPLISHMENTS

- Training about value based care competencies delivered
- SCCN earns highest level of quality performance with large health plan partner
- SCCN Pulse launched for self-service reports
- Maintenance of Certification: immunizations, asthma
- Pediatric care management services offered to plans, partners
- Participant JOCs held to increase engagement
- Patient Centered Medical Home (PCMH) change support
- URAC Accreditation as a CIN earned

SCCN TRANSFORMATIONAL ACTIVITIES

Quality and Care Transformations

Engagement

- Monthly Quality and Clinical Transformation Committee meetings focused on improvement and clinical transformation opportunities
- Monthly Nursing and Medical Assistant Forum
- Monthly Practice Manager operations meeting to share best practices and approaches

Transformation Initiatives

- NCQA Patient Centered Medical Home Recognition
- Integrated Behavioral Health Program
- Partnership with SCH on Outpatient Antibiotic Stewardship program (one of the first in the country)
- MOC Part IV projects - Preventive, Asthma
- Partnership with SCRI to launch Practice-Based Research Network (PBRN)

Care Management

- Evidence-based standard care management program (blended centralized and de-centralized approach)
- SCCN care manager reviews ED/Inpatient encounters, escalating to practices as needed for follow-up
- SCCN care manager supports practices in communication with SCH specialty clinics as needed or if barriers are noted
- Pediatric care management program offered for children with complex medical conditions

Information Technology Helps Transform Care Delivery

Population Health Tool, Wellcentive

- Patient registries • Quality measures, care gaps

Milliman's MedInsight Tool

- Quality performance • Risk coding • Cost and utilization

Collective Medical

- Regular review of ED/Inpatient encounters
- Coordination and outreach to practices

HIPAA Compliant Document Sharing

- Encrypted email and communication tools to review and coordinate ED/Inpatient encounters follow-up

SCCN Pulse

- On-demand self-serve reports to help practices manage care

Enterprise Data Warehouse

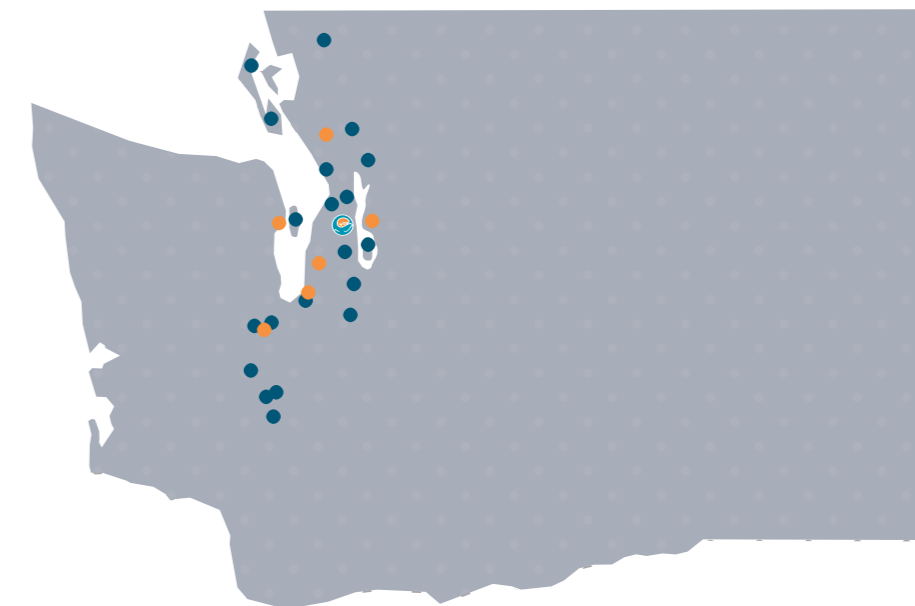

- Used by SCCN to perform analyses on populations to support cost, quality, diagnosis risk scoring, and program improvement initiatives across SCCN practices

The HUB

- Private, secure tool to support communication and collaboration for all network operations and initiatives
- Trainings, toolkits, and reference materials
